

QuCoNet reasoning circuit:

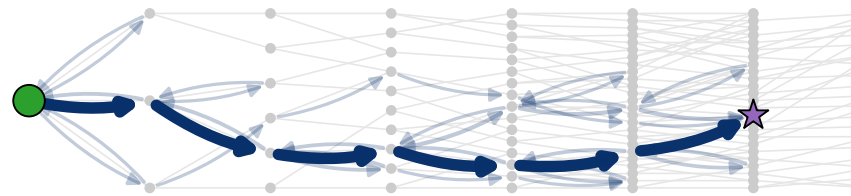

$$\mathcal{A} = \prod_s C_x$$

... M steps, one fresh path-record register each

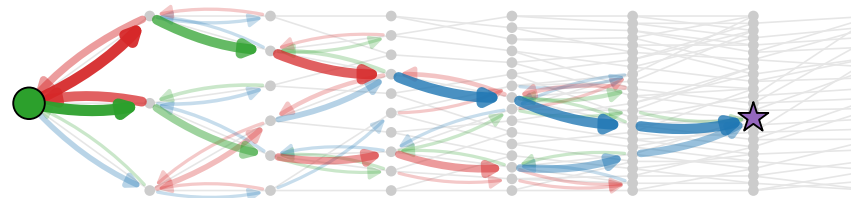

b

CoNet, single-attempt training: $p = 0.993$, IPR = 1.10

c

QuCoNet, Grover-trained: $p = 0.250$, IPR = 3.56

path-record channel

— $|0\rangle$ — $|1\rangle$ — $|2\rangle$
